

The Callers To Falsehood Create a Divide Between The Scholars and The Common Folk

by Ash Shaykh al 'Allāmah 'AbdAllāh ibn Muḥammad ibn Ḥumayd (رحمه الله)

The *Shaykh* stated:

And today there are plots carried out by the colonists during their travels and political recommendations in places where they wish to spread some of their doctrines; such as the Communists, *Qadianis*, Jews and Christians do, since they have a blueprint which is based on the fact that they see the Muslims as having honourable scholars just as they have people of good amongst them who enjoin the good and prohibit vice/immorality.

As such, (these previously mentioned plotters) say, 'A divide must be made between the scholars and the common folk,' and the manifestation of this 'divide' is that they say that the scholars 'have fallen short' and 'have not fulfilled their responsibilities'; and that 'their jobs have inundated them' and so on and forth...'

(They say) it is imperative that this (idea) is spread amongst the common folk so that they are drawn away from the scholars and do not accept (knowledge) from them.

As a result, (they say) if we come to the common folk with any ideology or innovation, they will accept it because the greatest obstacle in the path of achieving our goals is the scholars.

Consequently, if we create this divide between the scholars and the common folk, the scholars will not be taken from and the common folk will be the grounds for accepting ANY *da'wah* or call that comes to them from the non-Muslims.

These are their plots which we have read concerning them. This is from the most important issues which need to be considered and it is that the callers to falsehood create a divide between the scholars and the common folk. To the extent that if the scholars advise them or explain to them with proofs and evidences and guide them to the (straight) path, they will not accept it from them and as such, accept any call which opposes the call of *Islām*.

This is the plot of the colonists!
